K P PRAVEEN

Front-End Developer (React.js)

Contact : 9688553316 **Email** : praveen1510kp@gmail.com **LinkedIn** : linkedin.com/in/kppraveen

Portfolio : praveen/portfolio **Address** : 1-1/271-2 Kurinji Nagar, Mohan Nagar (opp), Salem, Tamil Nadu - 636 030

ABOUT ME

Results-driven Front-End Developer with 2+ years of experience building scalable web and mobile applications across fintech, HR, booking, and enterprise domains. Delivered 20–30% performance improvements through advanced React optimization and Redux state management. Comfortable owning full front-end lifecycles — from Figma to production — with cross-functional collaboration across design, backend, and QA teams.

EXPERIENCE

Kambaa Incorporations, Coimbatore Tamilnadu — Jan 2026 - PRESENT

Front-End Developer

- Developed a fully responsive Micro Finance web application covering loan management workflows, client data tracking, transaction history, and report generation using React.js and Tailwind CSS.
- Built dynamic form systems with multi-level validations for loan applications and client onboarding, reducing manual data-entry errors and streamlining finance team operations.
- Engineered the Slender Loris Zoo Booking website end-to-end — designing interactive UI, session-based ticket booking flows, and fully mobile-responsive layouts from Figma prototypes.
- Integrated REST APIs for booking availability, session scheduling, and payment workflows, ensuring a seamless user experience across devices.
- Collaborated directly with stakeholders to translate business requirements into production-ready features, owning both development and QA phases independently.

Nubiznez Private Limited ,Coimbatore Tamilnadu — Feb 2024 - Jan 2026

Front-End Developer

- Led front-end development for E-Smart Accounting Application, managing end-to-end lifecycle from architecture planning through QA and deployment for a Tally-integrated enterprise platform.
- Engineered payroll computation modules, salary slip generation, and multi-level employee data workflows for E-PayRoll App using React.js and Tailwind CSS, supporting complex multi-role HR operations.
- Designed and implemented Node.js backend services for payroll computation and report generation, enabling full-stack ownership of critical business logic.
- Built and maintained cross-platform mobile and web applications using React.js and React Native; reduced unnecessary re-renders by 30% via memoization and optimized Redux selectors.
- Drove 20–25% reduction in load time and UI latency across multiple modules through lazy loading, efficient rendering strategies, and asset optimization.
- Integrated REST APIs for authentication, bookings, transactions, and analytics; collaborated with designers to deliver pixel-perfect Figma-spec interfaces.
- Published the TBS Android app on Google Play Store; integrated Firebase Authentication and push notifications, improving user security and retention.
- Built a modular CRM dashboard for thebusstand.com with role-based access control (RBAC), supporting booking management, user analytics, and responsive desktop/tablet UI.

SKILLS

Core Languages : JavaScript(ES6+), HTML5, CSS3, Python

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js

Styling & UI: Tailwind CSS, Bootstrap, Ant Design, Figma

Database & Tools : PostgreSQL, Git, Firebase, Docker, Postman, JIRA

KEY PROJECTS

Micro Finance Application · Kambaa Incorporations

React.js · Tailwind CSS · REST APIs

- Built a scalable microfinance management platform for handling loans, customer records, and transaction reporting with secure and dynamic workflows.
- Implemented responsive React-based interfaces with advanced form validations and REST API integrations to streamline finance operations.

Slender Loris Zoo Booking Website · Kambaa Incorporations

React.js · Tailwind CSS · REST APIs

- Developed a complete online zoo ticket booking platform with interactive user flows, session-based reservations, and seamless payment-ready architecture.
- Designed mobile-responsive UI components using React.js and Tailwind CSS to enhance user engagement and booking experience.

E-Smart Accounting Application · Nubiznez

React.js · Tailwind CSS

- Engineered an enterprise accounting solution integrated with Tally for efficient financial data handling and reporting processes. Managed the full frontend lifecycle including UI planning, development, testing, optimization, and production deployment.

E-PayRoll Application · Nubiznez

React.js · Tailwind CSS · Node.js · REST APIs

- Created a payroll management system supporting salary computation, employee workflows, payslip generation, and detailed reporting modules.
- Integrated Node.js backend services and REST APIs to ensure accurate payroll processing and smooth data communication.

TBS Mobile App · Nubiznez

React Native · Firebase · REST API · Google Play Store

- Built and deployed a real-time bus ticket booking mobile application on the Google Play Store with secure Firebase authentication and push notifications.
- Developed responsive React Native screens and API integrations to provide seamless booking and live ticket management.

CRM Dashboard + Web Booking Platform — thebusstand.com · Nubiznez

React.js · Tailwind CSS · Redux

- Developed a modular CRM dashboard with role-based access control (RBAC) alongside a customer-facing booking platform for streamlined operations.
- Optimized Redux-based state management and application performance, improving responsiveness and user efficiency by 25%.

EDUCATION

B.E. – Computer Science Engineering

2019 – 2023

Velalar College of Engineering and Technology

CGPA: 8.3 / 10
